EDUCATION

Junior | **Plano West Senior High School**, Plano, TX

GPA: 4.45/4

Expected Graduation: May 2027

Relevant Coursework: AP Calculus BC, AP Physics 1, AP Computer Science A, PLTW Digital Electronics, Engineering Science, AP Precalculus.

EXPERIENCE

Shining Mindz, Frisco, TX

May 2025 - August 2025

Software Development Intern

- Developed a custom VBA script to automate data extraction from PowerPoint into Excel, reducing workload
- Enhanced data accuracy and streamlined reporting, improving efficiency of project updates
- Collaborated with a mentor to identify data needs and implement effective automation solutions
- Tested and debugged VBA code to ensure reliable performance across multiple datasets
- Documented workflow steps and automation procedures for easy handoff and future maintenance

PROJECTS

Vision Assistance Glasses | Arduino, C++

Summer 2025

- Built Arduino-based smart glasses with ultrasonic sensors for obstacle detection and audio alerts
- Created a modular design allowing easy upgrades for future features and improvements
- Documented build process, wiring diagrams, and code for reproducibility and project showcasing
- Programmed DFPlayer Mini to play voice prompts based on object distance for safer navigation
- Integrated sensors and audio hardware, optimizing code for consistent performance

Personal Portfolio Website | React

August 2025

- Developed a responsive portfolio site with React to showcase projects and experience
- Used React hooks, CSS variables, and flexbox/grid for a clean, scalable front-end design
- Added smooth scroll animations and an embedded resume for better engagement and accessibility
- Integrated external APIs and social media links, maintaining best practices for performance and SEO.

Owl and Automated Cookie Machine | VEX Robotics, C++

December 2024

- Built VEX Robotics owl with head rotation and automated cookie dispenser using C++ motor control
- Programmed smooth motion algorithms for servos and motors to enable precise, timed dispensing
- Integrated sensor feedback to automate actions and improve system reliability
- Tested and debugged hardware/software to ensure consistent performance under project constraints

LEADERSHIP

Habitat for Humanity Club | Shepton High School

August 2024 - May 2025

Founder & President

- Launched chapter, led officer team, and coordinated builds and outreach events
- Organized weekly volunteering and grew membership to over 30 students
- Developed a fundraising website for Habitat for Humanity, helping raise over \$500 and counting
- Built partnerships with local businesses and groups to support Habitat projects and increase engagement

SKILLS

Languages: C++, JavaScript, HTML, CSS, Python

Tools: GitHub, VS Code, React, Tinkercad, Fritzing

Hardware: Arduino, Microcontrollers, sensors, breadboarding, Embedded Systems, Circuit Design, PCB Design
